About Family Time

Family Time is a nonprofit program providing supportive, supervised visitation for children and parents who have been separated due to placement in foster care or custody disputes.

Family Time provides parental support before, during, and after the visit in order to give families the best opportunity for success.

Family Time uses parent-directed, pre-planning of the visit, suggestion and/or modeling of parenting techniques, as well as instruction and resources regarding child development, child engagement, and family enrichment.

Family Time provides objective, narrative documentation of family visits for use by DFCS or the court.

Family Time recognizes that the parent-child relationship is central to the child's sense of security and healthy development.

Family Time Visitation Supervisors are trained LMSWs dedicated to objective, nurturing guidance.

Family Time allows children to experience less stress, while family bonds are both strengthened and improved.

Where Will Visits Take Place?

Family Time provides visits in a neutral, comfortable environment in order to encourage consistent, meaningful experiences for children and families.

Families are encouraged to engage in family-centered activities such as games, educational activities, or preparing a family meal.

Family Time visits will now take place in our newly renovated home!

Here, families will have access to a home-like setting including a kitchen, playroom, living room, and playground.
